1 Introduction

1.1 Role of deliverable

The aim of this deliverable is to describe the current state of the CRYSTAL website as well as to describe further plans of enhancement during the project duration. The CRYSTAL Project Website is accessible via www.crystal-artemis.eu.

1.2 Relationship to other CRYSTAL Documents

There is a relationship with the CRYSTAL Dissemination Plan as well as with the Dissemination Reports.

2 HomePage

The CRYSTAL Homepage is characterized by 5 central elements:

1. CRYSTAL project logo. Wherever a user is currently reading on the project website, via the CRYSTAL logo a “return home” is possible
2. Search field: while at the current time of the project it is not that relevant, experience from other large projects has shown that the website content will grow significantly. Accordingly it is reasonable to have a search field to help the user find the content he/she is searching for
3. Rotating header: the rotating header provides the possibility to showcase 5 pictures resp. announcement.
4. News: the rotating news section has the aim to (a) announce CRYSTAL events, (b) provide information on current activities (c) promote conferences.
5. Main text with CRYSTAL abstract, acknowledgement and logo from European Union, ARTEMIS and FP7 to comply with the regulations set forth in the Grant Agreement.

The elements 1 until 3 are repeatedly visible on all pages and subpages of the CRYSTAL website. Therefore, they are not visible in the subsequent screenshots of the CRYSTAL pages.

Figure 2-1: CRYSTAL HomePage

3 Partner

On this subsite, all CRYSTAL partners are represented by logo respectively mentioning their name.

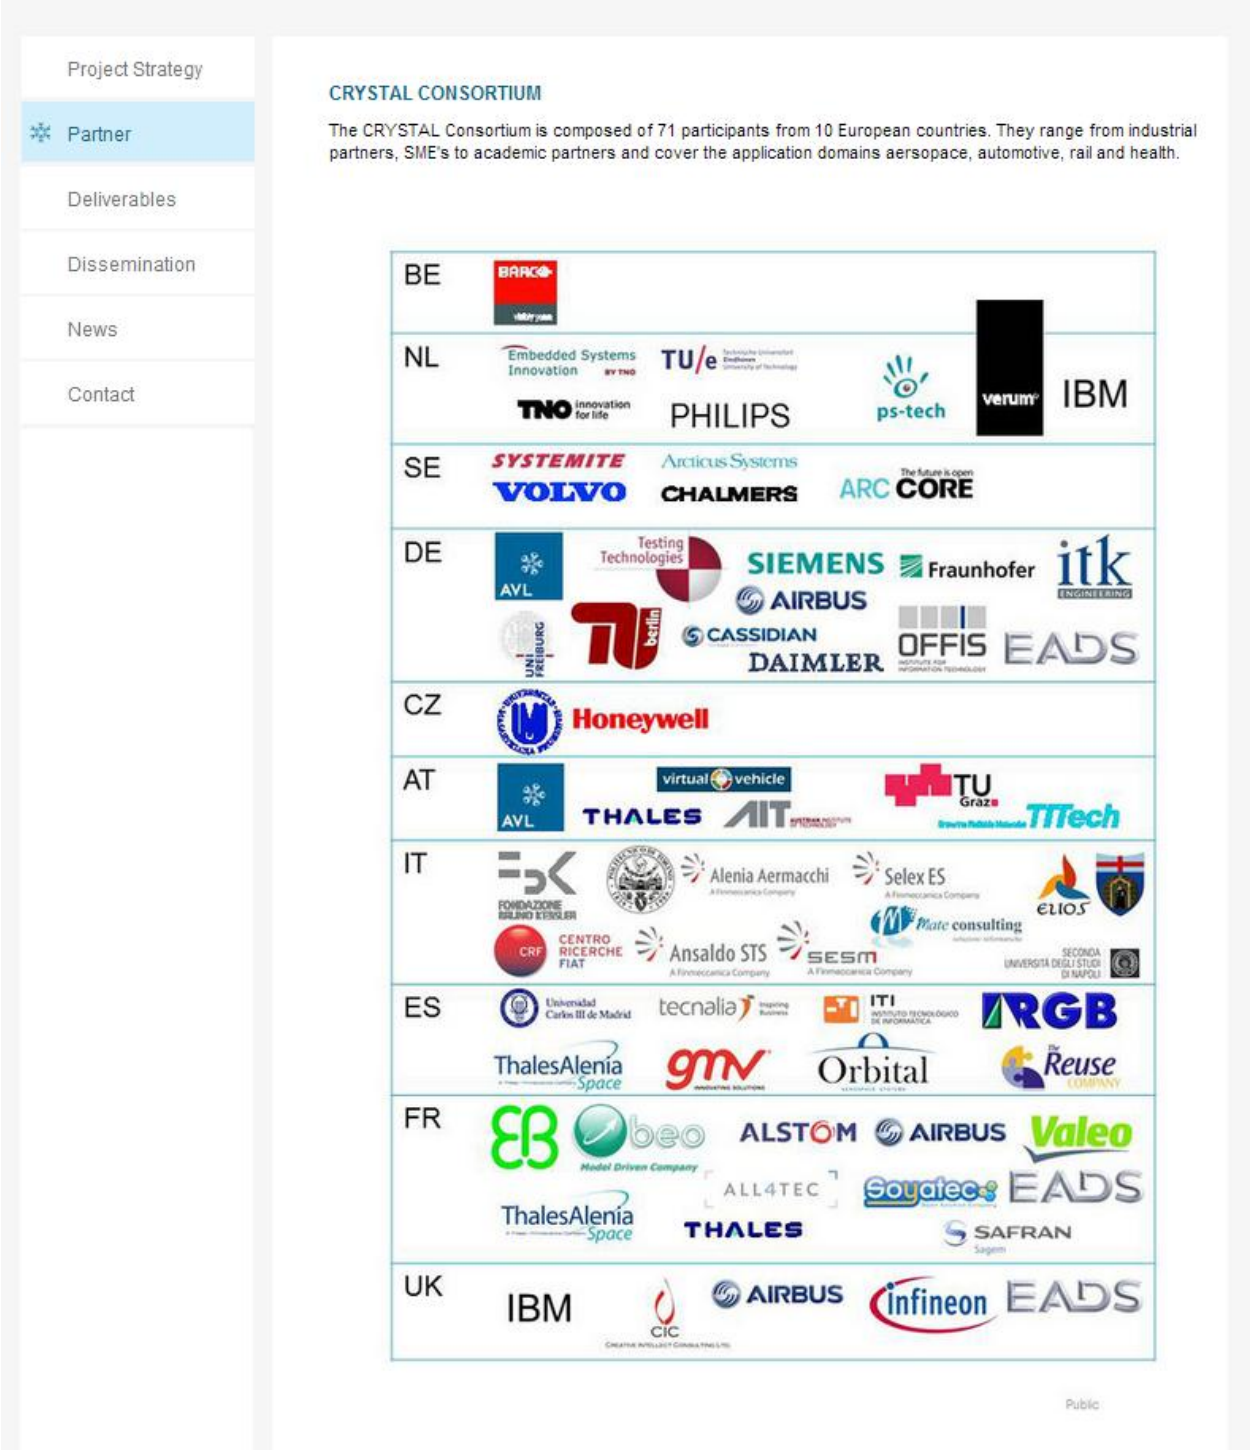

Figure 3-1: CRYSTAL subsite "Partner"

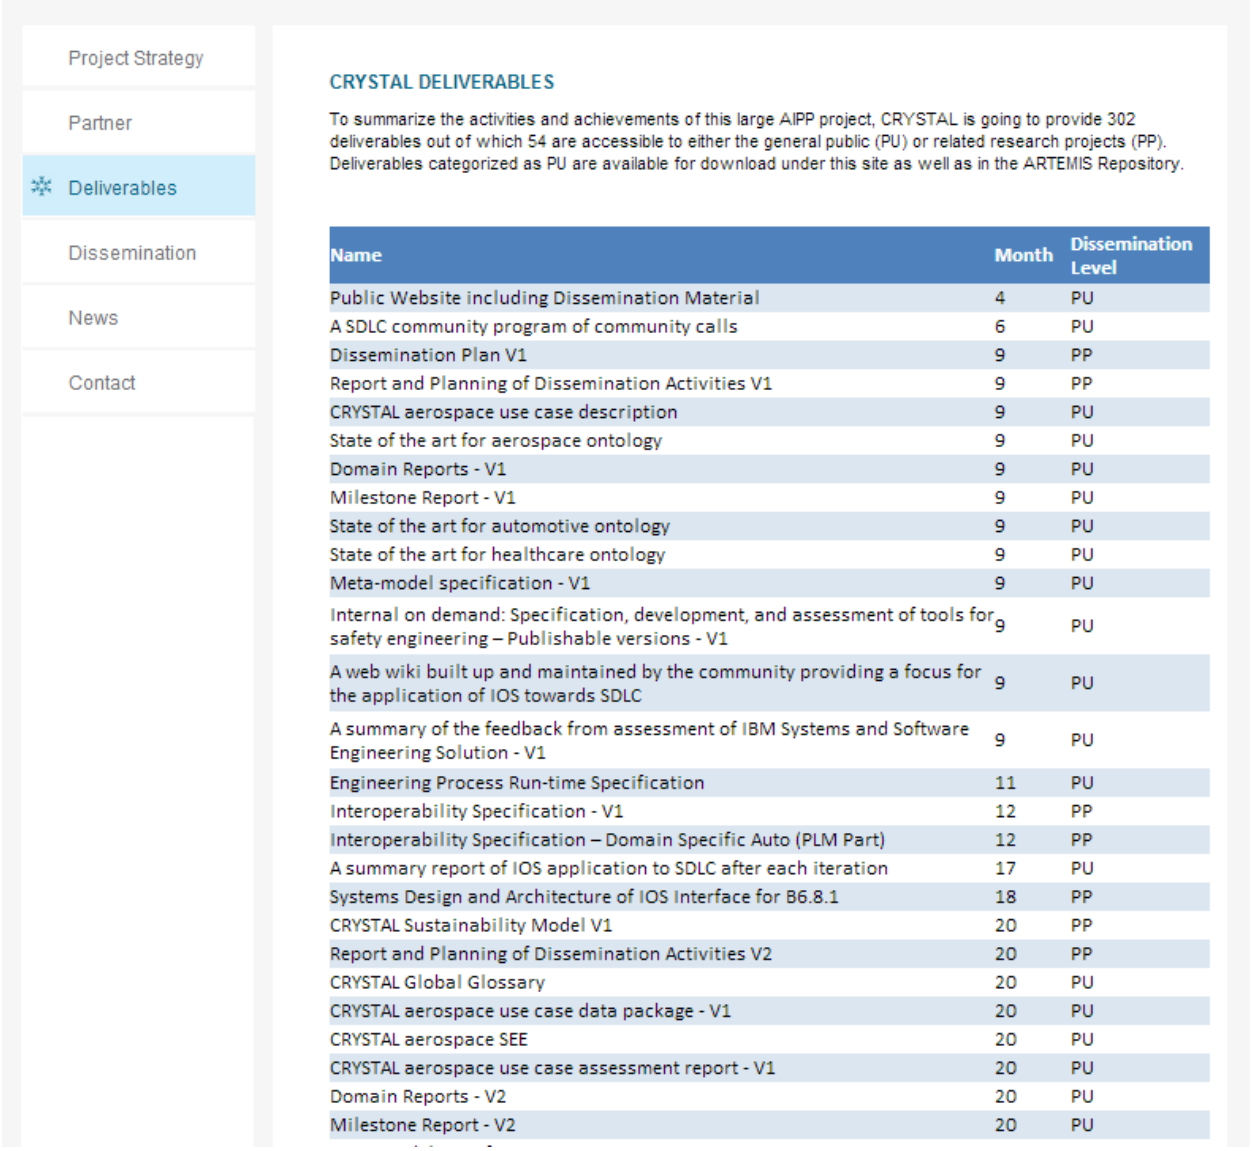
4 Deliverables

On this subsite, the CRYSTAL deliverables of status PU or PP are listed as here, either the download possibility or the link to access the documents will be provided. Due to the large amount of deliverables, it was decided not to include all 302 documents in this list.



CRYSTAL DELIVERABLES

To summarize the activities and achievements of this large AIPP project, CRYSTAL is going to provide 302 deliverables out of which 54 are accessible to either the general public (PU) or related research projects (PP). Deliverables categorized as PU are available for download under this site as well as in the ARTEMIS Repository.

Name	Month	Dissemination Level
Public Website including Dissemination Material	4	PU
A SDLC community program of community calls	6	PU
Dissemination Plan V1	9	PP
Report and Planning of Dissemination Activities V1	9	PP
CRYSTAL aerospace use case description	9	PU
State of the art for aerospace ontology	9	PU
Domain Reports - V1	9	PU
Milestone Report - V1	9	PU
State of the art for automotive ontology	9	PU
State of the art for healthcare ontology	9	PU
Meta-model specification - V1	9	PU
Internal on demand: Specification, development, and assessment of tools for safety engineering – Publishable versions - V1	9	PU
A web wiki built up and maintained by the community providing a focus for the application of IOS towards SDLC	9	PU
A summary of the feedback from assessment of IBM Systems and Software Engineering Solution - V1	9	PU
Engineering Process Run-time Specification	11	PU
Interoperability Specification - V1	12	PP
Interoperability Specification – Domain Specific Auto (PLM Part)	12	PP
A summary report of IOS application to SDLC after each iteration	17	PU
Systems Design and Architecture of IOS Interface for B6.8.1	18	PP
CRYSTAL Sustainability Model V1	20	PP
Report and Planning of Dissemination Activities V2	20	PP
CRYSTAL Global Glossary	20	PU
CRYSTAL aerospace use case data package - V1	20	PU
CRYSTAL aerospace SEE	20	PU
CRYSTAL aerospace use case assessment report - V1	20	PU
Domain Reports - V2	20	PU
Milestone Report - V2	20	PU

4.1 Further enhancement

For the further enhancement it is planned to provide the deliverables structured per WP as well as to provide PDF of the public deliverabes.

5 Dissemination

The central element of the subsite “Dissemination” is the tablet o provide dissemination material. At the current time, the following dissemination material as available (see Figure 5-1: CRYSTAL subsite “Dissemination”):

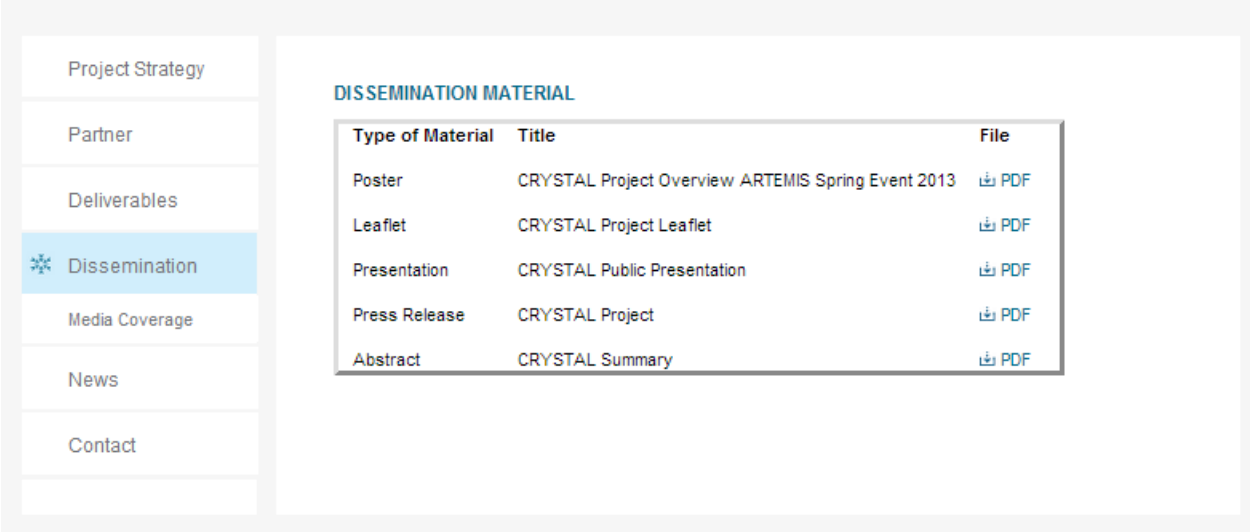

Figure 5-1: CRYSTAL subsite “Dissemination”

5.1 Media Coverage

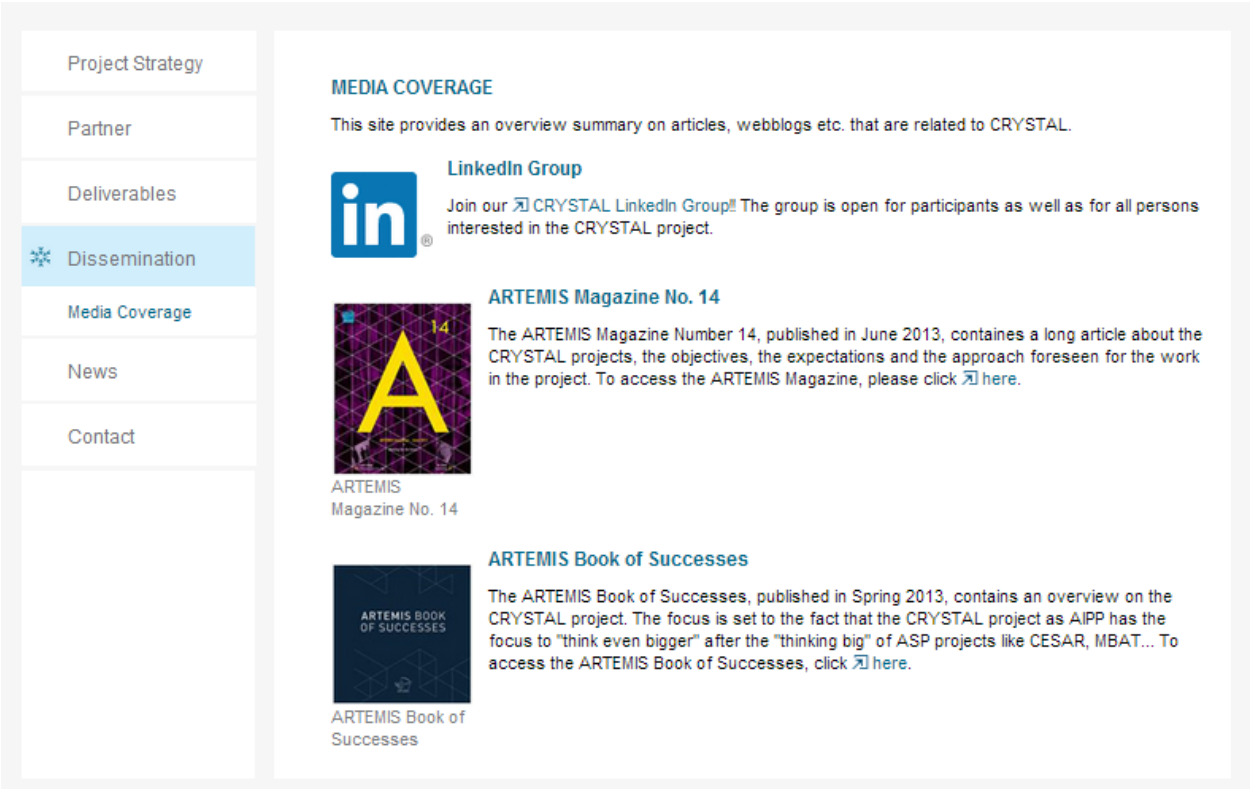

Figure 5-2: CRYSTAL subsite "Media Coverage"

5.2 Further enhancement

For the further updates of the section “Dissemination”, it is planned to include 2 additional subsites:

1. “Newsletter”: as the CRYSTAL consortium will publish regular newsletters, there will be a subsite listing all of these
2. “Publications”: with the large number of project partners and especially academic partners, it is expected that CRYSTAL will produce a significant number of technical publications. As soon as some publications are available, this subsite will be lauched to (a) provide a download possibility for publications public available or (b) provide information on where to retrieve the publication.

6 News

The subsite “News” is linked to the news corner on the CRYSTAL Homepage. Here, more detailed information on the events, activities… promoted is provided.

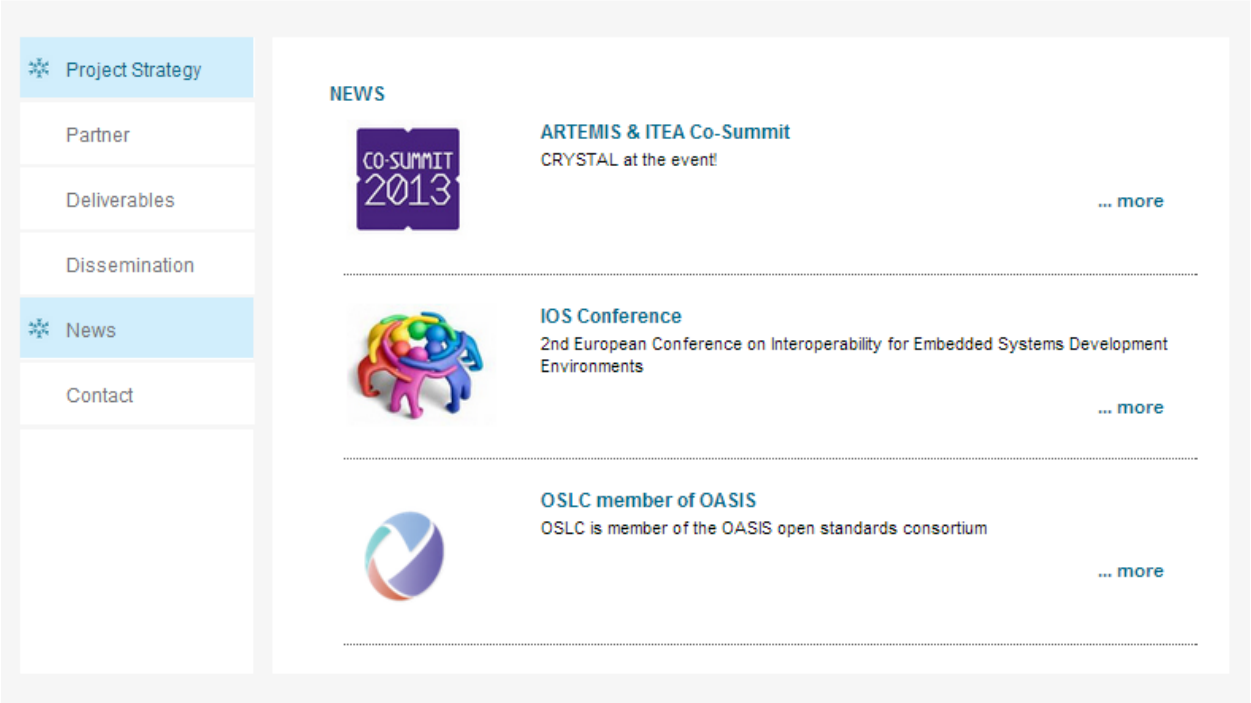

Figure 6-1: Subsite "News"

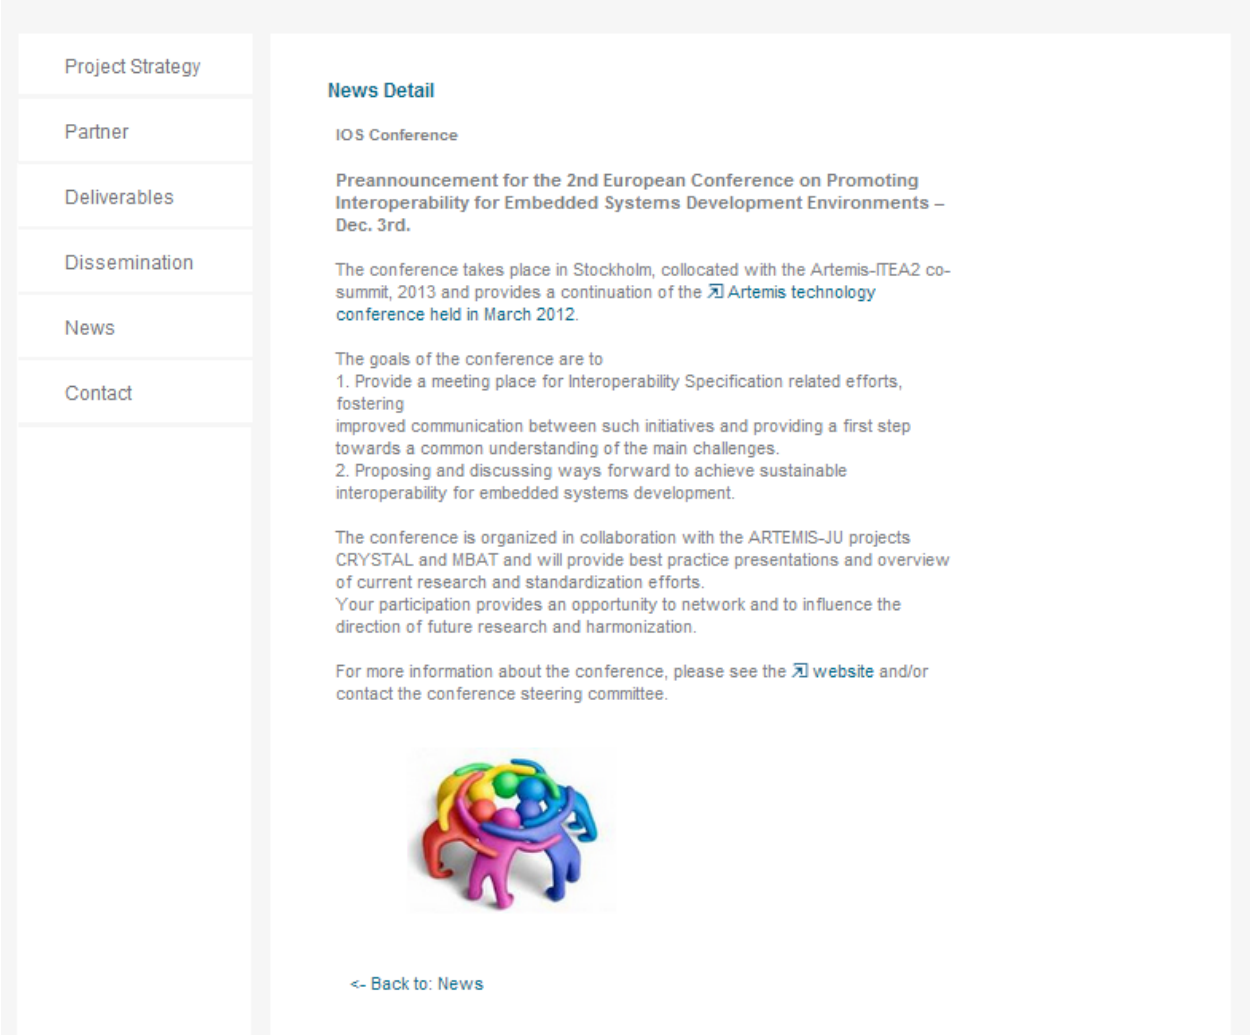

Figure 6-2: News Details "IOS Conference"

7 Contact

Under “contact”, there is a contact form to reach the coordinator. All requests are sent to the general CRYSTAL address under crystal@avl.com accessible for the CRYSTAL AVL project management team as well as to the dissemination manager. Additionally, this contact form provides the possibility for non-CRYSTAL members to register to the CRYSTAL Newsletter.

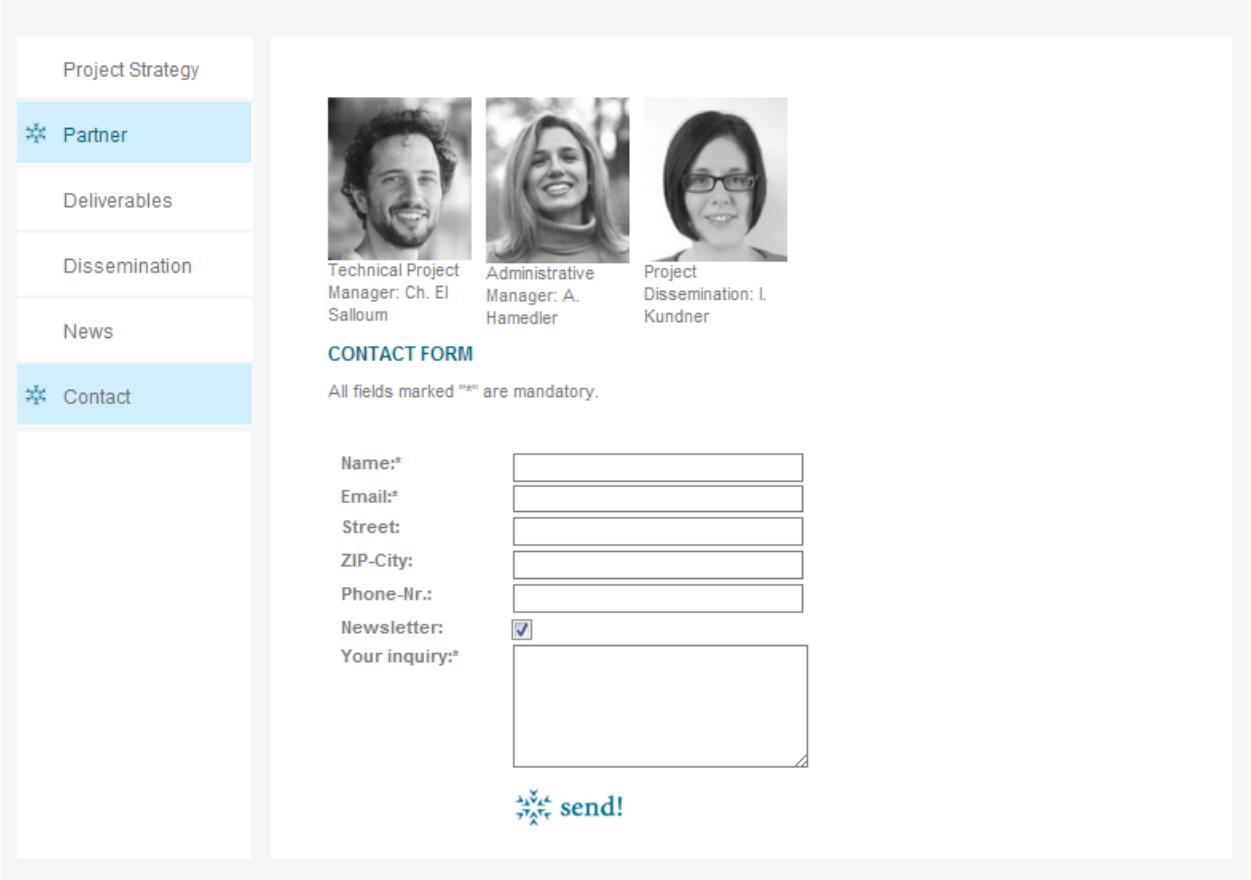

Figure 7-1: Contact Form

8 Further Enhancement

Besides the further enhancement already provided in the respective sections, 3 major enhancements are planned for the first project year.

8.1 Events

Under a subsite events, a review will be provided on (a) project specific events such as consortium meetings and (b) events where CRYSTAL has been represented. The site will be public after the ARTEMIS & ITEA Co-Summit.

8.2 Application Domains

In month 9, the application domains will finish the description of their public use cases. It is planned that a summary of these use cases is presented on the CRYSTAL homepage to also represent the application domains.

8.3 RTP / IOS

Also in month 9, after reaching the first project milestone, an enhancement towards RTP and IOS is planned. Especially the topic of IOS as open specification respectively future standard requires the availability of information. The CRYSTAL website will pay respect to this fact by providing continuous updates on that topic.

9 Terms, Abbreviations and Definitions

Please add additional terms, abbreviations and definitions for your deliverable.

CRYSTAL	**CR**itical S**YST**em Engineering **A**cce**L**eration
R	Report
P	Prototype
D	Demonstrator
O	Other
PU	Public
PP	Restricted to other program participants (including the JU).
RE	Restricted to a group specified by the consortium (including the JU).
CO	Confidential, only for members of the consortium (including the JU).
WP	Work Package
SP	Subproject
