

**Paul Tielemans**

---

## **Technical department manager, Philips**

Paul Tielemans (MSc) is currently a technical department manager at Philips. He is responsible for the mechatronics software development of the x-ray systems within Philips Healthcare – iGT systems. Since 2001 he is working in healthcare software, system design, system architect and management roles.

## **Accelerate development of medical x-ray systems**

In the healthcare industry safety and quality have the highest priority and effort. But, as in any industry, the speed of bringing your innovations to the market is key for business. With help of the Crystal project we accelerated our development by the usage of different (connected) tools and methodologies while increasing the first-time-right quality level as well.
