

Gray Bachelor

Senior Solution Architect, IBM Corporate Technology

Gray Bachelor is a senior Solution Architect in the IBM Watson IoT CTO office. He has 40 years of experience in complex system design from semiconductor devices, industrial systems, enterprise IT, mobile and cloud in high-tech industries involving supply chains, academia and collaborative EU projects. With a deep background in safety critical embedded industrial control systems, Gray has a particular focus on cross-discipline collaboration including interoperability across ALM, PLM and MBSE. Gray leads IBM's involvement in the Crystal project.
